

Ergonomic telephones

Accessory: Ergophone radio pendant TRX-S

Description

The Ergophone radio pendant TRX-S is used exclusively for radio call operation at an Ergophone telephone with integrated radio receiver. Pressing the button will trigger off the distress radio call.

The easy-to-use pendant includes a transceiver (TRX), which can transmit and receive. After the call is triggered, the LED glows red and turns to green after the receiver has confirmed.

The radio pendant can be worn with a strap like a wristwatch or around the neck with a cord. The cord is a part of the delivery package. It has been developed and designed to break when exposed to extra ordinary high mechanical load. Alternatively we offer a black elastic strap as an accessory.

Features

- Non-slip button with a clear pressing point
- Dust-tight and protected against water according to protection class IP67
- Hygienic, easy to clean
- European Social Alarm frequency 869,2 MHz
- Bidirectional transceiver (TRX)
- 2-color LED to indicate a triggered call (red) and acknowledgment of receipt (green)*
- Technical monitoring (battery monitoring and daily report)
- Battery: button cell CR2032 Lithium 3V
- Battery life: up to 5 years under normal use (emergency call trigger once a day and a test call weekly)
- Coverage: up to 30 m in buildings (depending of the building structure), up to 250 m outdoors

* Only if using a bidirectional radio receiver. Otherwise only red LED.

Technical data

Dimensions (D x H):	42 x 13 mm
Weight:	12 g (without cord)
Housing material:	Polycarbonate
Transmission time:	6 x 150 ms
Pauses between the transmissions:	150 ms
Radio receiver system:	869,2 MHz
Coverage:	up to 250 m outdoors up to 30 m in buildings
Useful life of the batterie:	up to 5 years
Temperature range	
- for operation:	5°C - 40°C
- for storage:	-5°C - 70°C
Colour of the cord:	Light grey
Length of the cord:	approx. 80 cm

Ergophone radio pendant TRX-S with grey cord
Color of the pendant: Light grey
Color of the button: Red

Subject to modifications.
